Configuring and Connecting via VPN for
Mac OS X 10.5 Leopard

1. Click on the apple icon in the top left hand of the desktop, please select "System Preferences".

2. Click on the "Network" icon listed underneath the "Internet & Network" Heading.
3. In the bottom left-hand corner, click on the + sign, located above the lock.

*NOTE*: (If the lock is locked, please click it to unlock it, and type in your Administrator name and Password in order to continue making changes.

4. A new window will open. Please select “VPN” as the interface, and VPN type as “PPTP” You can make the Service Name “Columbia Law School VPN.”

5. Click on “Create” and then the window will close.

6. In the Server Address field, type in “clsvpn.law.columbia.edu.”

7. Under Account Name, type in “LAW\” then follow with your username. (e.g. LAW\espen).

8. Click on “Authentication Settings,” and in the password field, enter your password. Then click OK.
9. Now click on “Advanced,” and in the window that pops up, check the box for “Send all traffic over VPN connection.” Then click OK.

10. Now click “Connect,” and you should be able to connect to the Law School network via your VPN connection.
